

## BROAD-SPECTRUM ULTRA FOLIAR

### 'Farmer to Farmer' Series | Volume 7 featuring Grant Borgward

by Carol Phillips, Executive Consultant Communications and Media

The topic of today's video from Grant is about a product that really needs no introduction. Broad-spectrum Ultra Foliar has no peer when it comes to all of the benefits it delivers for crops and pastures – however it is good to be reminded of its format and function.

Ultra Foliar has twelve nutrients.

It addresses hidden hunger and paddock variability.

It is cost effective and efficient because it ensures that every square meter of paddock or pasture has the right amount of nutrient.

It brings all of the main trace element requirements to optimal levels.

And, because of its phosphorus base it stimulates the plant's metabolism to give rapid root growth.

Take the time to watch the video presentation.
