

BSN SEED PRIMER

'Farmer to Farmer' Series | Volume 14 featuring Grant Borgward

by Carol Phillips, Executive Consultant Communications and Media

Today's video presentation sells a simple message.

If you can find a seed lot with high nutrient concentration in the seed, then it will yield more. And this is why BSN Seed Priming technology was developed and manufactured by RLF.

BSN Seed Primer is fertiliser for seeds – a unique concept that has been trialled, tested, evaluated and demonstrated in many growing environments across the world with great success.

View the video at the link below and hear how the levels of phosphorous, zinc, copper, manganese and molybdenum are boosted inside that seed.

Seed Priming
