RLF Introduction

Australia's RLF Liquid Fertiliser Company is a world leading multi-element liquid fertiliser manufacturer and supplier, providing high-quality crop nutrition products to the global agriculture industry.

In 2003, RLF entered the Chinese market and established distribution channels. RLF Chemical Fertilizers (Shanghai) Co., Ltd., a wholly owned subsidiary, is responsible for the sales in the Asia region.

Currently, RLF's leading technologies cover many areas: the world's top seed nutrition priming products, high-quality 12- element liquid fertilisers, water-soluble fertilisers, and RLF's world's highest multi-element liquid fertiliser.

The RLF team of professional is committed to providing innovative crop nutrition products to growers around the world to help farmers overcome the limitations of crop production. RLF is willing to dedicate its modest means to agriculture in China. Based on modern science and technology theory, with more than 20 years of plant physiology research and years of field trial results, RLF believes that the future of China's food will be healthier and that China's agriculture Growers will get richer.
