

SUCCESSFUL BSN SUPERSTRIKE TRIAL IN TURKEY

The Follow up Images that tell the Story

Authorised for release by :

Executive Consultant
Communications and Media

In June 2017, images were shared of the very early indicators of a wheat trial being conducted by RLF clients in Turkey. These photo images showed the early comparisons observed between the wheat crop treated with **BSN Superstrike** and the Control crop.

RLF client ASYA Crop Science have provided further images showing how beneficial **BSN Superstrike** proved to be, and these form part of the picture storyboard that follows.

The content of this media page was accurate and current at the time that it was written. This media release is provided for interested customers and other parties, and will remain a matter of RLF's historical record. Viewed in this context RLF therefore undertakes no obligation to update either material or content.
