

## RLF's NEW ZEALAND TEAM JUST LOVE FIELD DAYS

**Preparing for Mystery Creek, Hamilton in June 2019**

Authorised for release by:

**Carol Phillips,**  
Executive Consultant  
Communications and Media

Jason Reid and his busy team just love Field Days.

In March 2019 they were present at the Kirwee event on the South Island, and now they are busy preparing for the National Field Days at Mystery Creek, Hamilton, the 2nd largest Fieldday in New Zealand on 12th-15th June 2019.

The following photo board gives an idea of the setting for the event, and the demonstration patch that is being established. It should be carefully watched and evaluated at the event for its beneficial effects.

The products focus for this major event will be **Pasture Plus MAX** for mixed pasture and lucerne and **Plasma Fusion** for Brassicas and Cereals.

You are invited to visit site **D92** opposite the Innovation Centre.

The NZ Team will be joined by an Australian RLF representative, so this will be a good opportunity to learn more about these specialty fertiliser products.

Customers are very interested to learn about RLF Ultra Foliars, how they can boost production in cool weather shoulder seasons and enhance the nutrition of pasture within hours. But one big additional advantage is the impact on the developing root system which allows a more efficient moisture and soil nutrient uptake.

The content of this media page was accurate and current at the time that it was written. This media release is provided for interested customers and other parties, and will remain a matter of RLF's historical record. Viewed in this context RLF therefore undertakes no obligation to update either material or content.
