

FURTHER CASE SHARING EXPERIENCES FROM GROWERS IN HEBEI PROVINCE

The Continuing Education and Influence of the RLF Technical Team

Authorised for release by:

Melanie Wu,
Deputy General Manager, RLF China,
and translated by Echo Dong

The grape industry of Raoyang County in Hebei Province relies on its unique advantages of climate, temperature and soil conditions, and it has grown rapidly in recent years – so much so that the greenhouse grape has become the largest industrial feature of Raoyang County.

The main varieties grown are 'Victoria', 'Table Tennis' and 'Xiahei'. Colour, fruit powder and sugar degree are the important standards by which to measure the quality of grape, and some of the problems that most perplex the local growers are the difficulty of the colour change period, poor color change results, poor fruit powder and low sugar degree.

Aiming to address the pain points in the colour changing period of grapes, in combination with local planting habits and conditions, the RLF Hebei Sales and Technical Team promoted the colour changing product, RLF **Power PK**.

The RLF Technology Services Team returned to Raoyang on 10th May 2020 to gauge the results of their advice.

Case Sharing No.1

Location	Yanggezhuang, Raoyang County
Farmer	Cui GuangCe
Variety	Greenhouse Table Tennis grape
Product/Date Used	Applied RLF Power PK on 28 th April 2020
Results Observed	The colour of grape ears changed evenly on both the sunny side and the shady side
Inspection Date	10 th May 2020

Case Sharing No.2

Location	Zhanggezhuang, Raoyang County
Farmer	Li Erwei
Variety	Greenhouse Victoria grape
Product/Date Used	Applied RLF Power PK on 23 rd April 2020
Results Observed	Fast colour change, increased sugar content with the average reading for sugar content being 16.5
Inspection Date	11 th May 2020

Case Sharing No.3

Location	Beimazhuang, Raoyang County
Farmer	Wei Shengyuan
Variety	Greenhouse Victoria grape
Product/Date Used	Applied RLF Power PK on 1 st May 2020
Results Observed	Fast colour change, and under the same management conditions the greenhouse treated with RLF products was listed 7 days earlier
Inspection Date	12 th May 2020

Based on the comprehensive results observed during the revisits to these grape growers, it is clear that the application of RLF **Power PK** assists the vines in the colour changing period.

The benefits experienced by these growers were:

- Increased sugar content
- Even colour change
- Early listing to market

The RLF Technology Service is still in progress. You can look forward to more exciting case sharing experiences.
